Dear Mr

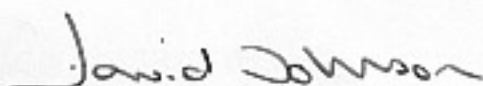

ROACCUTANE

We are now able to report on the outcome of the screening process.

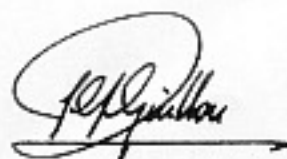

Please note that the screeners have focused upon your allegations of scientific misconduct by Professor Cunliffe. After a detailed investigation and taking into account your various letters (including your further letter of 10 March) the screeners have concluded that there are no *prima facie* grounds for considering that Professor Cunliffe has committed any scientific misconduct and that there is no case for either the Trust or the University to proceed with any further action in this regard.

The screeners' enquiries did not extend to questions relating to the efficacy of Roaccutane as a product. These issues are the responsibility of the appropriate licensing agencies and, if you still have concerns in this area, we suggest that you contact them.

Yours sincerely

DAVID JOHNSON
Chief Executive

PROFESSOR PIERRE GUILLOU
Dean of School of Medicine
